2.d. Prinsip-prinsip Konsolidasian

keuangan konsolidasian mencakup laporan keuangan Perusahaan dan entitasentitas anak seperti disebutkan pada Catatan 1.c.

Entitas anak adalah entitas yang dikendalikan oleh Grup, yakni Grup terekspos, atau memiliki hak, atas imbal hasil variabel dari keterlibatannya dengan entitas dan memiliki kemampuan untuk mempengaruhi imbal hasil tersebut melalui kemampuan kini untuk mengarahkan aktivitas relevan dari entitas (kekuasaan atas *investee*).

Keberadaan dan dampak dari hak suara potensial dimana Grup memiliki kemampuan praktis untuk melaksanakan (yakni hak substantif) dipertimbangkan saat menilai apakah Grup mengendalikan entitas lain.

Laporan keuangan Grup mencakup hasil usaha arus kas, aset dan liabilitas dari Perusahaan dan seluruh entitas anak yang, secara langsung dan tidak langsung, dikendalikan oleh Perusahaan. Entitas anak dikonsolidasikan sejak tanggal efektif akuisisi, yaitu tanggal dimana Grup secara efektif memperoleh pengendalian atas bisnis yang diakuisisi, sampai tanggal pengendalian berakhir.

Entitas induk menyusun laporan keuangan konsolidasian dengan menggunakan kebijakan akuntasi yang sama untuk transaksi dan peristiwa lain dalam keadaan yang serupa. Seluruh transaksi, saldo, laba, beban, dan arus kas dalam intra kelompok usaha terkait dengan transaksi antar entitas dalam grup eliminasi secara penuh.

Grup mengatribusikan laba rugi dan setiap komponen dari penghasilan komprehensif lain kepada pemilik entitas induk dan kepentingan non-pengendali meskipun hal tersebut mengakibatkan kepentingan non-pengendali memiliki saldo defisit. Grup menyajikan kepentingan nonpengendali di ekuitas dalam laporan posisi keuangan konsolidasian, terpisah dari ekuitas pemilik entitas induk.

Perubahan dalam bagian kepemilikan entitas induk pada entitas anak yang tidak mengakibatkan hilangnya pengendalian adalah transaksi ekuitas (yaitu transaksi dengan pemilik dalam kapasitasnya sebagai pemilik). Ketika proporsi ekuitas yang dimiliki oleh kepentingan non-pengendali berubah, Grup menyesuaikan jumlah tercatat kepentiangan pengendali dan kepentingan non-pengendali untuk mencerminkan perubahan kepemilikan relatifnya dalam entitas anak. selisih antara jumlah dimana kepentingan nonpengendali disesuaikan dan nilai wajar dari jumlah yang diterima atau dibayarkan diakui langsung dalam ekuitas dan diatribusikan pada pemilik dari entitas induk.

Jika Grup kehilangan pengendalian, maka Grup: a.

- Menghentikan pengakuan aset (termasuk *goodwill*) dan liabilitas entitas anak pada jumlah tercatatnya ketika pengendalian hilang:
- Menghentikan pengakuan jumlah tercatat setiap kepentingan non-pengendali pada entitas anak terdahulu ketika pengendalian hilang (termasuk setiap komponen penghasilan komprehensif lain yang diatribusikan pada kepentingan non-pengendali);
- Mengakui nilai wajar pembayaran yang diterima (jika ada) dari transaksi, peristiwa, atau c. eadaan yang mengakibatkan hilangnya pengendalian;
- Mengakui sisa investasi pada entitas anak terdahulu pada niali wajarnya pada tanggal hilangnya pengendalian;
- Mereklasifikasikan ke laba rugi, atau mengalihkan secara langsung ke saldo laba jika disyaratkan oleh SAK lain, jumlah yang diakui dalam penghasilan komprehensif lain dalam kaitan dengan entitas anak
- Mengakui perbedaan ataupun yang dihasilkan sebagai keuntungan atau kerugian dalam laba rugi yang diatribusikan kepada entitas induk

2.e. Transaksi dan Saldo dalam Mata Uang Asing

PSAK No. 73 : "Lease"

The implementation of the above standards had no significant effect on the amount reported for the current or prior financial vears.

2.d. Principles of Consolidation

The consolidated financial statements incorporate the financial statements of the Company and subsidiaries as described in Notes 1.c.

A subsidiary is an entity controlled by the Group, ie the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its current ability to direct the entity's relevant activities (power over the investee).

The existance and effect of substantive potential voting rights that the Group has the practical ability to exercise (ie substantive rights) are considered when assessing whether the Group controls another entity.

The Group's fianncial statements incorporate the results, cash flows, assets, and liabilities of the Company and all of its directly and indirectly controlled subsidiaries. Subsidiaries are consolidated from the effective date of acquisition, which is the date on which the Group effectively obtains control of the acquired business, until that control ceases.

A parent prepares consolidated financial statements using uniform accounting policies for like transactions and other events in similar circumtances. All intragroup transactions, balances, income, expenses and cash flows are eliminated in full on consolidation.

The group attributed the profit and loss and each component of other comprehensive income to the owners of the parent and non-controlling interest even though this results is the non-controlling interest having a deficit balance. The Group presents non-controlling interest in equity in the consolidated statement of financial position. separately from the equity owners of the parent.

Changes in the parent's ownership interest in subsidiary that do not result in loss of control are equity transactions (ie transactions with owners in their capacity as owners). When the proportion of equity held by non-controlling interest change, the Group adjusted the carrying amounts of the controlling interest and non-controlling interest to reflect the changes in their relative interest in the subsidiaries. Any difference between the amount by which the non-controlling interest are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to the owners of the parent.

If the Group loses control, the Group:

- Derecognize the assets (including goodwill) and liabilities of te subsidiary at their carrying amounts at the date when control is lost:
- Derecognize the carrying amount of any non-controlling interest in the former subsidiary at the date when b. control is lost (including any components of other comprehensive income attributable to them);
- Recognize the fair value of the consideration received, if any, from the transaction, event or c. circumtances that resulted in the loss of control
- Н Recognize any investment retained in the former subsidiary at fair value at the date when control is lost
- Reclassify to profit or loss, or transfer directly to retained earnings if required by other SAKs, the amount e. recognized in other comprehensive income in relation to the subsidiary;
- Recognizes any resulting difference as a gain or loss attributable to the parent. f.

Transactions and Balances in Foreign Currencies

In preparing financial statements, each of the entities within the Group record by using the currency of the primary economic environtment in which the entity operates ("the functional currency"). The functional currency of the Company and most of the subsidiares are Rupiah.

Penurunan Nilai Aset Keuangan

Pada setiap akhir periode pelaporan, Grup mengevaluasi apakah terdapat bukti objektif bahwa aset keuangan atau kelompok aset keuangan mengalami penurunan nilai. Aset keuangan atau kelompok aset keuangan diturunkan nilainya dan kerugian penurunan nilai telah terjadi, jika dan hanya jika, terdapat bukti objektif mengenai penurunan nilai tersebut sebagai akibat dari satu atau lebih peristiwa yang terjadi setelah pengakuan awal aset tersebut (peristiwa yang merugikan), dan peristiwa yang merugikan tersebut berdampak pada estimasi arus kas masa depan dari aset keuangan atau kelompok aset keuangan yang dapat diestimasi secara andal

Berikut adalah bukti obiektif bahwa aset keuangan atau kelompok aset keuangan mengalami

- Kesulitan keuangan signifikan yang dialami penerbit atau pihak peminjam;
- Pelanggaran kontrak, seperti terjadinya gagal bayar atau tunggakan pembayaran pokok h.
- Terdapat kemungkinan bahwa pihak peminiam akan dinyatakan pailit atau melakukan reorganisasi keuangan lainnya;
- Terdapat data yang dapat diobservasi yang mengindikasikan adanya penurunan yang dapat diukur atas estimasi arus kas masa depan dari kelompok aset keuangan sejak pengakuan awal aset, seperti memburuknya status pembayaran pihak peminiam atau kondisi ekonomi yang berkorelasi dengan gagal bayar.

Untuk investasi pada instrumen ekuitas, penurunan yang signifikan atau penurunan jangka panjang dalam nilai wajar instrumen ekuitas di bawah biaya perolehannya merupakan bukti obiektif teriadinya penurunan nilai.

Jika terdapat bukti objektif bahwa kerugian penurunan nilai telah terjadi atas pinjaman yang diberikan dan piutang atau investasi dimiliki hingga jatuh tempo yang dicatat pada biaya perolehan diamortisasi, maka jumlah kerugian tersebut diukur sebagai selisih antara jumlah tercatat aset dan nilai kini estimasi arus kas masa depan yang didiskonto menggunakan suku bunga efektif awal dari aset tersebut dan diakui pada laba rugi.

Jika penurunan dalam nilai wajar atas aset keuangan tersedia untuk dijual telah diakui dalam penghasilan komprehensif lain dan terdapat bukti obiektif bahwa aset tersebut mengalami pengriasilari korinjerlerisi rain dari terdapat duki dojektir bariwa aset tersebut mengalarin penurunan nilai, maka kerugian kumulatif yang sebelumnya diakui dalam penghasilan komprehensif lain direklasifikasi dari ekuitas ke laba rugi sebagai penyesuaian reklasifikasi meskipun aset keuangan tersebut belum dihentikan pengakuannya. Jumlah kerugian kumulatif vang direklasifikasi adalah selisih antara biaya perolehan (setelah dikurangi pelunasan pokok dan amortisasi) dan nilai wajarkini, dikurangi kerugian penurunan nilai aset keuangan yang sebelumnya telah diakui dalam laba rugi.

Metode Suku Bunga Efektif

Metode suku bunga efektif adalah metode yang digunakan untuk menghitung biaya perolehan diamortisasi dari aset atau liabilitas keuangan (atau kelompok aset atau liabilitas keuangan) dan metode untuk mengalokasikan pendapatan bunga atau beban bunga selama periode yang relevan. Suku bunga efektif adalah suku bunga yang secara tepat mendiskontokan estimasi pembayaran atau penerimaan kas masa depan selama perkiraan umur dari instrumen keuangan, atau jika lebih tepat, digunakan periode yang lebih singkat untuk memperoleh jumlah tercatat neto dari aset keuangan atau liabilitas keuangan. Pada saat menghitung suku bunga efektif, Grup mengestimasi arus kas dengan mempertimbangkan seluruh persyaratan kontraktual dalam instrumen keuangan tersebut, seperti pelunasan dipercepat, opsi beli dan opsi serupa lain, tetapi tidak mempertimbangkan kerugian kredit masa depan. Perhitungan ini mencakup seluruh komisi dan bentuk lain yang dibayarkan atau diterima oleh pihak-pihak dalam kontrak yang merupakan bagian takterpisahkan dari suku bunga efektif, biaya transaksi, dan seluruh premium atau diskonto lain.

Grup tidak mereklasifikasi derivatif dari diukur pada nilai wajar melalui laba rugi lama derivatif tersebut dimiliki atau diterbitkan dan tidak mereklasifikasi setiap instrumen keuangan dari diukur melalui laba rugi jika pada pengakuan awal instrumen keuangan tersebut ditetapkan oleh Grup sebagai diukur pada nilai wajar melalui laba rugi. Grup dapat mereklasifikasi aset keuangan yang diukur pada nilai wajar melalui laba rugi, jika aset keuangan tidak lagi dimiliki untuk tujuan penjualan atau pembelian kembali aset keuangan tersebut dalam waktu dekat. Grup tidak mereklasifikasi setiap instrumen keuangan ke diukur pada nilai wajar melalui laba rugi setelah pengakuan awal.

Jika, karena perubahan intensi atau kemampuan Grup, instrumen tersebut tidak tepat lagi diklasifikasikan sebagai investasi dimiliki hingga jatuh tempo, maka investasi tersebut direklasifikasi menjadi tersedia untuk dijual dan diukur kembali pada nilai wajar. Jika terjadi penjualan atau reklasifikasi atas investasi dimiliki hingga jatuh tempo dalam jumlah yang lebih dari jumlah yang tidak signifikan, maka sisa investasi dimiliki hingga jatuh tempo direklasifikasi menjadi tersedia untuk dijual, kecuali penjualan atau reklasifikasi tersebut dilakukan ketika aset keuangan sudah mendekati jatuh tempo atau tanggal pembelian kembali, terjadi setelah seluruh jumlah pokok telah diperoleh secara substansial sesuai jadwal pembayaran atau telah diperoleh pelunasan dipercepat; atau terkait dengan kejadian tertentu yang berada di luar kendali, tidak berulang, dan tidak dapat diantisipasi secara wajar

impairment of minarcial assets. At the end of each reporting period, the Group assess whether there is any objective evidence that a financial asset or group of financial assets is impaired. A financial asset or group of financial assets is impaired and impairment lossess are incurred, if and only if, there is objective evidence of impairment as a result of one or more events that occured after the initial recognition of the asset (loss event), and that loss event has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

The following are objective evidence that a financial asset or group of financial assets is impaired:

- Significant financial difficulty of the issuer or obligor
- A breach of contract, such as default or delinquency in interest or principal payments: b.
- C. It becoming probable that the borrower will enter bankruptcy or other financial reorganization:
- d. Observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition, such as adverse changes in the payment status of borrowers or economic condition that correlate with defaults.

For investment in equity instrument, a significant and prolonged decline in the fair value of the equity instrument below its cost is an objective evidence of impairment.

If there is objective evidence that an impairment loss has been incurred on loans and receivable or held-to-maturity investments carried at amortized cost, the amount of impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate and recognized in profit or loss.

When a decline in the fair value of an available-for-sale financial asset has been recognized in other comprehensive income and there is objective evidence that the asset is impaired, the cumulative loss that had been recognized in other comprehensive income shall be reclassified from equity to profit or loss as a reclassification adjustment even though the financial assets has not been derecognized. The amount of the cumulative loss that is reclassified are the difference between the acquisition cost (net of any principal repayment and amortisation) and current fair value, less any impairment loss on that financial asset previously recognized in

The Effective Interest Method

The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discount estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Group estimate cash flows considering all contractual terms of the financial instrument, for example, prepayment, call and similar option, but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts

Reclassification

The Group shall not reclassify a derivative out of the fair value through profit or loss category while it is held or issued and not reclassify any financial instrument out of the fair value through profit or loss category if upon initial recognition it was designated by the Group as at fair value through profit or loss. The Group may reclassify that financial asset out of the fair value through profit or loss category if a financial asset is no longer held for the purpose of selling or repurchasing it in the near term. The Group shall not reclassify any financial instrument into the fair value through profit or loss category after initial recognition.

If, as a result of a change in Group's intention or ability, it is no longer appropriate to classify an investment as held to maturity, it shall be reclassified as available for sale and remeasured at fair value. Whenever sales or reclassification of more than an insignificant amount of held-to-maturity investments, any remaining held-to-maturity investments shall be reclassified as available for sale, other than sales or reclassification that are so close to maturity or the financial asset's call date, occur after all the financial asset's original principal has been collected substantially through scheduled payments or prepayments, or are attributable to an isolated event that is beyond control, non-recurring, and could not have been reasonably anticipated.

Offsetting a Financial Asset and a Financial Liability

Pengukuran Nilai Wajar

Nilai wajar adalah harga yang akan diterima untuk menjual suatu aset atau harga yang akan dibayar untuk mengalihkan suatu liabilitas dalam transaksi teratur antara pelaku pasar pada tanggal pengukuran.

Nilai wajar aset dan liabillitas keuangan diestimasi untuk keperluan pengakuan dan pengukuran atau untuk keperluan pengungkapan.

Nilai wajar dikategorikan dalam level yang berbeda dalam suatu hirarki nilai wajar berdasarkan pada apakah input suatu pengukuran dapat diobservasi dan signifikansi input terhadap keseluruhan pengukuran nilai wajar:

- Harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik yang dapat diakses pada tanggal pengukuran (Level 1)
- Input selain harga kuotasian yang termasuk dalam Level 1 yang dapat diobservasi untuk aset atau liabilitas, baik secara langsung maupun tidak langsung (Level 2)
- c. Input yang tidak dapat diobservasi untuk aset atau liabilitas (Level 3)

Dalam mengukur nilai wajar aset atau liabilitas, Grup sebisa mungkin menggunakan data pasar yang dapat diobservasi. Apabila nilai wajar aset atau liabilitas tidak dapat diobservasi secara langsung, Grup menggunakan teknik penilaian yang sesuai dengan keadaannya dan memaksimalkan penggunaan input yang dapat diobservasi yang relevan dan meminimalkan penggunaan input yang tidak dapat diobservasi.

Perpindahan antara level hirarki wajar diakui oleh Grup pada akhir periode pelaporan dimana perpindahan terjadi.

2.h. Kas dan Setara Kas

Kas dan setara kas termasuk kas, kas di bank (rekening giro), dan deposito jangka pendek dengan jangka waktu jatuh tempo 3 (tiga) bulan atau kurang sejak tanggal penempatannya dan tidak digunakan sebagai jaminan dan tidak dibatasi penggunaannya.

Biaya persediaan terdiri dari seluruh biaya pembelian, biaya konversi, dan biaya lain yang timbul sampai persediaan berada dalam kondisi dan lokasi saat ini. Biaya perolehan ditentukan dengan metode rata-rata tertimbang. Nilai realisasi neto merupakan taksiran harga jual dalam kegiatan usaha biasa dikurangi estimasi biaya penyelesaian dan estimasi biaya yang diperlukan untuk membuat penjualan.

Setiap penurunan nilai persediaan di bawah biaya perolehan menjadi nilai realisasi neto dan seluruh kerugian persediaan diakui sebagai beban pada periode terjadinya penurunan atau kerugian tersebut. Setiap pemulihan kembali penurunan nilai persediaan karena peningkatan kembali nilai realisasi neto, diakui sebagai pengurangan terhadap jumlah beban persediaan pada periode terjadinya pemulihan tersebut.

2.j. Investasi pada Entitas Asosiasi

Entitas asosiasi adalah entitas dimana Grup memiliki kekuasaan untuk berpartisipasi dalam keputusan kebijakan keuangan dan operasional investee, tetapi tidak mengendalikan atau mengendalikan bersama atas kebijakan tersebut (pengaruh signifikan).

Bagian atas laba rugi investee diakui dalam laba rugi. Penerimaan distribusi dari investee mengurangi nilai tercatat investasi. Penyesuaian terhadap jumlah tercatat tersebut juga mungkin dibutuhkan untuk perubahan dalam proporsi bagian investor atas investee yang timbul dari penghasilan komprehensif lain, termasuk perubahan yang timbul dari revaluasi aset tetap dan selisih penjabaran valuta asing. Bagian investor atas perubahan tersebut diakui dalam penghasilan komprehensif lain.

Grup menghentikan penggunaan metode ekuitas sejak tanggal ketika investasinya berhenti menjadi investasi pada entitas asosiasi sebagai berikut:

- iika investasi menjadi entitas anak.
- jika sisa kepentingan dalam entitas asosiasi merupakan aset keuangan, maka Grup mengukur sisa kepentingan tersebut pada nilai wajar.

Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of financial assets and financial liabilities must be estimated for recognition and measurement or for disclosure purposes.

Fair values are categorised into different levels in a fair value hierarchy based on the degree to which the inputs to the measurement are observable and the significance of the inputs to the fair value measurement in its entirety:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities that can be accessed at the measurement date (Level 1)
- Inputs other than quoted prices included in Level 1 that are observable for the assets or liabilities, either directly or indirectly (Level 2)
- c. Unobservable inputs for the assets or liabilities (Level 3)

When measuring the fair value of an asset or a liability, the Group uses market observable data to the extent possible. If the fair value of an asset or a liability is not directly observable, the Group uses valuation techniques that appropriate in the circumstances and maximizes the use of relevant observable inputs and minimizes the use of unobservable inputs.

Transfers between levels of the fair value hierarchy are recognised by the Group at the end of the reporting period during which the change occurred.

. Cash and Cash Equivalents

Cash and cash equivalents are cash on hand, cash in banks (demand deposits) and time deposits with maturity periods of three months or less at the time of placement that are not used as collateral or are not restricted.

Inventories are carried at the lower of cost and net realizable value. The cost of inventories comprise all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Cost is determined using the weighted average method. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

The amount of any write-down of inventories to net realisable value and all losses of inventories shall be recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

2.j. Investment in Associates

Associates are entities which the Group has the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies (significant influence).

Investment in associates accounted for using the equity method. Under the equity method, the investment in an associate is initially recognised at cost and the carrying amount is increased or decreased to recognise the investor's share of the profit or loss of the invester is recognised in profit or loss. Distributions received from an investee reduce the carrying amount of the investment. Adjustments to the carrying amount may also be necessary for changes in the investor's proportionate interest in the investee arising from changes in the investee's other comprehensive income, including those arising from the revaluation of property, plant and equipment and from foreign exchange translation differences. The investor's share of those changes is recognized in other comprehensive income.

The Group discontinue the use of the equity method from the date when its investment ceases to be an associate as follows:

- if the investment becomes a subsidiary.
- If the retained interest in the former associate is a financial asset, the Group measure the retained interest at fair value.
- c. When the Group discontinue the use of the equity method, the Group account for all amounts previously recognized in other comprehensive income in relation to that investment on the same basis as would have been required if the investee had directly disposed of the related assets or liabilities.

.k. Prepaid Expenses

Prepaid expenses are amortized over their beneficial periods by using the straight-line method. The short-term portion of prepaid expenses is shown as part of current assets, while long term portion is presented as part of non current assets.

Liabilitas Sewa

Pada tanggal dimulainya sewa, Grup mengakui liabilitas sewa yang diukur pada nilai kini dari pembayaran sewa yang akan dilakukan selama masa sewa.

Dalam menghitung nilai sekarang dari pembayaran sewa, Grup menggunakan suku bunga pinjaman modal kerja pada tanggal dimulainya sewa. Selain itu, nilai tercatat kewajiban sewa diukur kembali jika ada modifikasi, perubahan jangka waktu sewa, perubahan pembayaran sewa.

Setelah pengakuan awal, Grup memilih menggunakan modal biaya dan mengukur properti investasi sebesar biaya perolehan dikurangi akumulasi penyusutan dan akumulasi rugi penurunan nilai aset. Hak atas tanah tidak disusutkan dan disajikan sebesar biaya perolehan. Bangunan disusutkan dengan metode garis lurus berdasarkan taksiran masa manfaat ekonomis (20 tahun).

ease Liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term.

In calculating the present value of lease payments, the Group uses its working capital loan rate at the lease commencement date. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments.

The Group applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Group as a Lessor

An investment property shall be measured initially at its cost, comprises its purchase price and any directly attributable expenditure (professional fees for legal services, property transfer taxes and other transaction costs). Transaction costs are included in the initial measurement.

After initial recognition, the Group choose to use cost model and measure its investment property at acquisition cost less accumulated depreciation and accumulated impairment losses. Landrights are not depreciated and are carried at costs. Buildings are depreciated using the straight-line method over their estimated useful lives (20 years).

Maintenance and repairment costs are charged to profit or loss as incurred, while renewals and betterments are

Aset takberwujud dengan umur tidak terbatas diuji untuk penurunan nilai setiap tahun dan kapanpun terdapat suatu indikasi bahwa aset takberwujud mungkin mengalami penurunan nilai.

Penurunan Nilai Aset

Pada setiap akhir periode pelaporan, Grup menilai apakah terdapat indikasi aset mengalami penurunan nilai. Jika terdapat indikasi tersebut, Grup mengestimasi jumlah terpulihkan aset tersebut. After initial recognition, fixed assets, except land, are carried at its cost less any accumulated depreciation, and any accumulated impairment losses.

Depreciation of fixed assets starts when its available for use and its computed by using straight-line method based on the estimated useful lives of assets as follows :

All costs, including borrowing costs, incurred in relation with the construction of these assets are capitalized as part of the cost of assets in construction. Cost of assets in construction shall exclude any internal profits, cost of abnormal amounts of wasted material, labour, or other resources incurred.

The accumulated costs will be transferred to the respective fixed assets items at the time the asset is completed or ready for use and are depreciated since the operation.

The carrying amount of an item of fixed assets is derecognized on disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arrising from derecognition (that determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item) is included in profit or loss when item is derecognized

At the end of each reporting period, the Company made regular review of the useful lives, residual values, depreciation method and residual life based on the technical conditions.

Intangible Assets

Intangible asset is measured on initial recognition at cost. After initial recognition, intangible asset is carried at cost less any accumulated amortization and any accumulated impairment loss

The useful life of intangible asset is assessed to be eiter finite or indefinite

Intangible asset with finite useful life

Intangible asset with finite useful life is amortized over the economic useful life by using a straight-line method.

Amortization is calculated so as to write off the cost of the asset, less its estimated residual value, over its useful economic life as follows:

Software: 25 % straight line

The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at each financial year-end.

Intangible asset with indefinite useful life

Intangible asset with indefinite useful life is not amortized. The useful life of an intangible with an indefinite that is not being amortized is reviewed annually to determine whether events and circumstances continue to support an indefinite useful life assessment for that asset. If they do not, the change in the useful life assessment from indefinite to finite is accounted for on a prospective basis

Intangible asset with indefinite life is tested for impairment annually and whenever there is an indication that the intangible asset may be impaired.

Impairment of Assets

At the end of each reporting period, the Group assess whether there is any indication that an asset may be impaired. If any such indication exists, the Group shall estimate the recoverable amount of the asset. Recoverable amount is determined for an individual asset, if its is not possible, the Group determines the recoverable amount of the asset's cash-generating unit.

The recoverable amount is the higher of fair value less costs to sell and its value in use. Value in use is the present value of the estimated future cash flows of the asset or cash generating unit. Present values are computed using pre-tax discount rates that reflect the time value of money and the risks specific to the asset or unit whose impairment is being measured.

Pada awal tahun 2020, Badan Nasional Penanggulangan Bencana Republik Indonesia mengumumkan berlakunya "Status Keadaan Tertentu Darurat Bencana Wabah Penyakit Akibat Virus Corona" setelah ditemukannya beberapa orang yang teridentifikasi terpapar virus corona (dikenal juga sebagai Covid-19). Kondisi darurat ini, bersamaan dengan situasi perekonomian global yang terdampak pandemi Covid-19, menyebabkan penurunan perekonomian dalam negeri di awal tahun 2020, yang antara lain ditandai dengan melemahnya nilai tukar rupiah dan menurunnya hargaharga sekuritas di pasar modal.

Grup tidak memiliki pinjaman bank, dan memiliki pendanaan yang memadai dalam bentuk kas dan setara kas untuk mempertahankan operasional selama beberapa bulan ke depan.

Manajemen Grup menyatakan bahwa Grup tidak mengalami dampak sigifikan per tanggal posisi keuangan karena tidak signifikannya exposure kedua hal tersebut.

Lebih lanjut, bisnis Grup mengalami dampak signifikan yang mencakup:

- Penurunan kedatangan pengunjung ke gerai ritel;
- b. Penutupan gerai ritel yang ada di pusat perbelanjaan; dan
- Penurunan omzet penjualan Grup. c.

Dalam menghadapi kondisi tersebut, manajemen Grup telah menyusun langkah-langkah untuk mempertahankan kelangsungan usaha Grup dengan rencana-rencana sebagai berikut:
a. Fokus terhadap penjualan tidak langsung atau on line antara lain: dengan melalui website dan

- penjualan di gerai ritel melalui aplikasi komunikasi (whatsapp);
- Tetap menjalankan kebijakan untuk menjual barang-barang yang dibutuhkan dengan harga yang wajar untuk membantu mencegah penyebaran Covid-19, khususnya barang-barang yang berkaitan dengan kesehatan dan kebersihan serta disisi lain memperkuat loyalitas pelanggan dan reputasi brand;
- Melakukan pendekatan ke member dengan mengirimkan e-mail tentang produk-produk khusus yang berkaitan dengan situasi saat ini yaitu produk-produk kesehatan, kebersihan dan kegemaran untuk pengisi waktu di rumah; dan
- Efisiensi biaya antara lain merubah fokus biaya marketing dari memasang advertising pada billboard, katalog dan brosur menjadi media digital dengan biaya advertising yang lebih hemat, menegosiasikan pembebasan sewa dan service charge ke beberapa pemilik gedung, dan mengurangi biaya-biaya lain yang tidak relevan seperti: biaya perjalanan dinas dan biaya

In early 2020, National Agency for Disaster Management of the Republic of Indonesia announced the enactment of "the Specific Emergency Disasters Corona Virus Outbreak Status" after the discovery of several people who were identified as being affected by the corona virus (also named Covid-19). This emergency condition, together with the global economic situation affected by the Covid-19 pandemic, caused a downturn in the domestic economy in early 2020, which was characterized by a weakening of the rupiah exchange rate and a decline in the prices of securities on the capital market.

The Group does not have a bank loan, and has adequate funding in the form of cash and cash equivalents to maintain operations for the next several months.

The Group's management states that the Group did not experience a significant impact as of the financial position date due to the insignificant exposure of these matters

Furthermore, the Group's business facing significant impacts includes:

- Declining visitor arrivals to retail outlets;
- b. Closing of retail outlets in shopping centers; and
- Declining Group sales turnover. c.

To address these conditions, the Group's management has compiled the steps to maintain the Group's business continuity with following plans:

- Focus on indirect or on line sales include: through websites and sales at retail outlets through communication applications (whatsapp);
- Keep running the policy to sell the items needed at a fair price to help prevent the spread of b. Covid-19, especially items related to health and hygiene and on the other hand strengthen customer loyalty and brand reputation;
- Approach the members by sending e-mails about specific products related to the current situation, which are health products, cleanliness and hobbies to fill time at home; and
- Efficiency expenses including changing the focus of marketing expenses from installing advertising on Н billboards, catalogs and brochures to digital media with more cost-effective advertising expenses, negotiating rent and service charge exemptions to several building owners, and reducing other irrelevant expenses such as: traveling expenses and utility expenses.
