PSAK No. 73 : "Sev

Implementasi dari standar-standar tersebut tidak memiliki dampak yang signifikan terhadap jumlah yang dilaporkan di tahun berjalan atau sebelumnya.

#### 2.d. Prinsip-prinsip Konsolidasian

keuangan konsolidasian mencakup laporan keuangan Perusahaan dan entitasentitas anak seperti disebutkan pada Catatan 1.c.

Entitas anak adalah entitas yang dikendalikan oleh Grup, yakni Grup terekspos, atau memiliki hak, atas imbal hasil variabel dari keterlibatannya dengan entitas dan memiliki kemampuan untuk mempengaruhi imbal hasil tersebut melalui kemampuan kini untuk mengarahkan aktivitas relevan dari entitas (kekuasaan atas *investee*).

Keberadaan dan dampak dari hak suara potensial dimana Grup memiliki kemampuan praktis untuk melaksanakan (yakni hak substantif) dipertimbangkan saat menilai apakah Grup mengendalikan entitas lain.

Laporan keuangan Grup mencakup hasil usaha arus kas, aset dan liabilitas dari Perusahaan dan seluruh entitas anak yang, secara langsung dan tidak langsung, dikendalikan oleh Perusahaan. Entitas anak dikonsolidasikan sejak tanggal efektif akuisisi, yaitu tanggal dimana Grup secara efektif memperoleh pengendalian atas bisnis yang diakuisisi, sampai tanggal pengendalian berakhir.

Entitas induk menyusun laporan keuangan konsolidasian dengan menggunakan kebijakan akuntasi yang sama untuk transaksi dan peristiwa lain dalam keadaan yang serupa. Seluruh transaksi, saldo, laba, beban, dan arus kas dalam intra kelompok usaha terkait dengan transaksi antar entitas dalam grup eliminasi secara penuh.

Grup mengatribusikan laba rugi dan setiap komponen dari penghasilan komprehensif lain kepada pemilik entitas induk dan kepentingan non-pengendali meskipun hal tersebut mengakibatkan kepentingan non-pengendali memiliki saldo defisit. Grup menyajikan kepentingan nonpengendali di ekuitas dalam laporan posisi keuangan konsolidasian, terpisah dari ekuitas pemilik entitas induk.

Perubahan dalam bagian kepemilikan entitas induk pada entitas anak yang tidak mengakibatkan hilangnya pengendalian adalah transaksi ekuitas (yaitu transaksi dengan pemilik dalam kapasitasnya sebagai pemilik). Ketika proporsi ekuitas yang dimiliki oleh kepentingan non-pengendali berubah, Grup menyesuaikan jumlah tercatat kepentiangan pengendali dan kepentingan non-pengendali untuk mencerminkan perubahan kepemilikan relatifnya dalam entitas anak, selisih antara jumlah dimana kepentingan nonpengendali disesuaikan dan nilai wajar dari jumlah yang diterima atau dibayarkan diakui langsung dalam ekuitas dan diatribusikan pada pemilik dari entitas induk.

Jika Grup kehilangan pengendalian, maka Grup:

- Menghentikan pengakuan aset (termasuk goodwill) dan liabilitas entitas anak pada jumlah a.
- tercatatnya ketika pengendalian hilang; Menghentikan pengakuan jumlah tercatat setiap kepentingan non-pengendali pada entitas b. anak terdahulu ketika pengendalian hilang (termasuk setiap komponen penghasilan komprehensif lain yang diatribusikan pada kepentingan non-pengendali);
- Mengakui nilai wajar pembayaran yang diterima (jika ada) dari transaksi, peristiwa, atau keadaan yang mengakibatkan hilangnya pengendalian; Mengakui sisa investasi pada entitas anak terdahulu pada niali wajarnya pada tanggal
- hilangnya pengendalian; Mereklasifikasikan ke laba rugi, atau mengalihkan secara langsung ke saldo laba jika disyaratkan oleh SAK lain, jumlah yang diakui dalam penghasilan komprehensif lain dalam kaitan dengan entitas anak
- Mengakui perbedaan ataupun yang dihasilkan sebagai keuntungan atau kerugian dalam laba rugi yang diatribusikan kepada entitas induk

## 2.c New and Revised Statement and Interpretation of Financial Accounting Standards Effective in The Current

PSAK No. 73 : "Lease"

The implementation of the above standards had no significant effect on the amount reported for the current or prior financial years.

#### 2.d. Principles of Consolidation

The consolidated financial statements incorporate the financial statements of the Company and subsidiaries as described in Notes 1.c.

A subsidiary is an entity controlled by the Group, ie the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its current ability to direct the entity's relevant activities (power over the investee).

The existance and effect of substantive potential voting rights that the Group has the practical ability to exercise (ie substantive rights) are considered when assessing whether the Group controls another entity.

The Group's fianncial statements incorporate the results, cash flows, assets, and liabilities of the Company and all of its directly and indirectly controlled subsidiaries. Subsidiaries are consolidated from the effective date of acquisition, which is the date on which the Group effectively obtains control of the acquired business, until that control ceases.

A parent prepares consolidated financial statements using uniform accounting policies for like transactions and other events in similar circumtances. All intragroup transactions, balances, income, expenses and cash flows are eliminated in full on consolidation.

The group attributed the profit and loss and each component of other comprehensive income to the owners of the parent and non-controlling interest even though this results is the non-controlling interest having a deficit balance. The Group presents non-controlling interest in equity in the consolidated statement of financial position, separately from the equity owners of the parent.

Changes in the parent's ownership interest in subsidiary that do not result in loss of control are equity transactions (ie transactions with owners in their capacity as owners). When the proportion of equity held by non-controlling interest change, the Group adjusted the carrying amounts of the controlling interest and non-controlling interest to reflect the changes in their relative interest in the subsidiaries. Any difference between the amount by which the noncontrolling interest are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to the owners of the parent.

If the Group loses control, the Group:

- Derecognize the assets (including goodwill) and liabilities of te subsidiary at their carrying amounts at the a. date when control is lost:
- Derecognize the carrying amount of any non-controlling interest in the former subsidiary at the date when b. control is lost (including any components of other comprehensive income attributable to them).
- c. Recognize the fair value of the consideration received, if any, from the transaction, event or circumtances that resulted in the loss of control

Grup menghentikan pengakuan liabilitas keuangan, jika dan hanya jika, liabilitas keuangan tersebut berakhir, yaitu ketika kewajiban yang ditetapkan dalam kontrak dilepaskan atau dibatalkan atau kedaluwarsa

#### Penurunan Nilai Aset Keuangan

Pada setiap akhir periode pelaporan, Grup mengevaluasi apakah terdapat bukti objektif bahwa aset keuangan atau kelompok aset keuangan mengalami penurunan nilai. Aset keuangan atau kelompok aset keuangan diturunkan nilainya dan kerugian penurunan nilai telah terjadi, jika dan hanya jika, terdapat bukti objektif mengenai penurunan nilai tersebut sebagai akibat dari satu atau lebih peristiwa yang terjadi setelah pengakuan awal aset tersebut (peristiwa yang merugikan), dan peristiwa yang merugikan tersebut berdampak pada estimasi arus kas masa depan dari aset keuangan atau kelompok aset keuangan yang dapat diestimasi secara andal.

Berikut adalah bukti objektif bahwa aset keuangan atau kelompok aset keuangan mengalami penurunan nilai:

- a. Kesulitan keuangan signifikan yang dialami penerbit atau pihak peminjam;
- Pelanggaran kontrak, seperti terjadinya gagal bayar atau tunggakan pembayaran pokok atau bunga:
- Terdapat kemungkinan bahwa pihak peminjam akan dinyatakan pailit atau melakukan reorganisasi keuangan lainnya;
- d. Terdapat data yang dapat diobservasi yang mengindikasikan adanya penurunan yang dapat diukur atas estimasi arus kas masa depan dari kelompok aset keuangan sejak pengakuan awal aset, seperti memburuknya status pembayaran pihak peminjam atau kondisi ekonomi yang berkorelasi dengan gagal bayar.

Untuk investasi pada instrumen ekuitas, penurunan yang signifikan atau penurunan jangka panjang dalam nilai wajar instrumen ekuitas di bawah biaya perolehannya merupakan bukti obiektif teriadinya penurunan nilai.

Jika terdapat bukti objektif bahwa kerugian penurunan nilai telah terjadi atas pinjaman yang diberikan dan piutang atau investasi dimiliki hingga jatuh tempo yang dicatat pada biaya perolehan diamortisasi, maka jumlah kerugian tersebut diukur sebagai selisih antara jumlah tercatat aset dan nilai kini estimasi arus kas masa depan yang didiskonto menggunakan suku bunga efektif awal dari aset tersebut dan diakui pada laba rugi.

Jika penurunan dalam nilai wajar atas aset keuangan tersedia untuk dijual telah diakui dalam penghasilan komprehensif lain dan terdapat bukti objektif bahwa aset tersebut mengalami penurunan nilai, maka kerugian kumulatif yang sebelumnya diakui dalam penghasilan komprehensif lain direklasifikasi dari ekuitas ke laba rugi sebagai penyesuaian reklasifikasi meskipun aset keuangan tersebut belum dihentikan pengakuannya. Jumlah kerugian kumulatif yang direklasifikasi adalah selisih antara biaya perolehan (setelah dikurangi pelunasan pokok dan amortisasi) dan nilai wajarkini, dikurangi kerugian penurunan nilai aset keuangan yang sebelumnya telah diakui dalam laba rugi.

#### Metode Suku Bunga Efektif

Metode suku bunga efektif adalah metode yang digunakan untuk menghitung biaya perolehan diamortisasi dari aset atau liabilitas keuangan (atau kelompok aset atau liabilitas keuangan) dan metode untuk mengalokasikan pendapatan bunga atau beban bunga selama periode yang relevan. Suku bunga efektif adalah suku bunga yang secara tepat mendiskontokan estimasi pembayaran atau penerimaan kas masa depan selama perkiraan umur dari instrumen keuangan, atau jika lebih tepat, digunakan periode yang lebih singkat untuk memperoleh jumlah tercatat neto dari aset keuangan atau liabilitas keuangan. Pada saat menghitung suku bunga efektif, Grup mengestimasi arus kas dengan mempertimbangkan seluruh persyaratan kontraktual dalam instrumen keuangan tersebut, seperti pelunasan dipercepat, opsi beli dan opsi serupa lain, tetapi tidak mempertimbangkan kerugian kredit masa depan. Perhitungan ini mencakup seluruh komisi dan bentuk lain yang dibayarkan atau diterima oleh pihak-pihak dalam kontrak yang merupakan bagian takterpisahkan dari suku bunga efektif, biaya transaksi, dan seluruh premium atau diskontol lain.

#### Reklasifikas

Grup tidak mereklasifikasi derivatif dari diukur pada nilai wajar melalui laba rugi lama derivatif tersebut dimiliki atau diterbitkan dan tidak mereklasifikasi setiap instrumen keuangan dari diukur melalui laba rugi jika pada pengakuan awal instrumen keuangan tersebut ditetapkan oleh Grup sebagai diukur pada nilai wajar melalui laba rugi. Grup dapat mereklasifikasi aset keuangan yang diukur pada nilai wajar melalui laba rugi, jika aset keuangan tidak lagi dimiliki untuk tujuan penjualan atau pembelian kembali aset keuangan tersebut dalam waktu dekat. Grup tidak mereklasifikasi setiap instrumen keuangan ke diukur pada nilai wajar melalui laba rugi setelah pengakuan awal.

Jika, karena perubahan intensi atau kemampuan Grup, instrumen tersebut tidak tepat lagi diklasifikasikan sebagai investasi dimiliki hingga jatuh tempo, maka investasi tersebut direklasifikasi menjadi tersedia untuk dijual dan diukur kembali pada nilai wajar. Jika terjadi penjualan atau reklasifikasi atas investasi dimiliki hingga jatuh tempo dalam jumlah yang lebih dari jumlah yang tidak signifikan, maka sisa investasi dimiliki hingga jatuh tempo direklasifikasi menjadi tersedia untuk dijual, kecuali penjualan atau reklasifikasi tersebut dilakukan ketika aset keuangan sudah mendekati jatuh tempo atau tanggal pembelian kembali, terjadi setelah seluruh jumlah pokok telah diperoleh secara substansial sesuai jadwal pembayaran atau telah diperoleh pelunasan dipercepat; atau terkait dengan kejadian tertentu yang berada di luar kendali, tidak berulang, dan tidak dapat diantisipasi secara wajar.

The Group remove a financial liability from its statement of financial position when, and only when, it is extinguished, ie when the obligation specified in the contract is discharged or cancelled or expires.

#### Impairment Of Financial Assets

At the end of each reporting period, the Group assess whether there is any objective evidence that a financial asset or group of financial assets is impaired. A financial asset or group of financial assets is impaired and impairment lossess are incurred, if and only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (loss event), and that loss event has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

The following are objective evidence that a financial asset or group of financial assets is impaired:

- Significant financial difficulty of the issuer or obligor
- b. A breach of contract, such as default or delinquency in interest or principal payments;
- c. It becoming probable that the borrower will enter bankruptcy or other financial reorganization:
- d. Observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition, such as adverse changes in the payment status of borrowers or economic condition that correlate with defaults.

For investment in equity instrument, a significant and prolonged decline in the fair value of the equity instrument below its cost is an objective evidence of impairment.

If there is objective evidence that an impairment loss has been incurred on loans and receivable or held-to-maturity investments carried at amortized cost, the amount of impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate and recognized in profit or loss.

When a decline in the fair value of an available-for-sale financial asset has been recognized in other comprehensive income and there is objective evidence that the asset is impaired, the cumulative loss that had been recognized in other comprehensive income shall be reclassified from equity to profit or loss as a reclassification adjustment even though the financial assets has not been derecognized. The amount of the cumulative loss that is reclassified are the difference between the acquisition cost (net of any principal repayment and amortisation) and current fair value, less any impairment loss on that financial asset previously recognized in profit or loss.

#### The Effective Interest Method

The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discount estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Group estimate cash flows considering all contractual terms of the financial instrument, for example, prepayment, call and similar option, but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts.

#### Reclassification

The Group shall not reclassify a derivative out of the fair value through profit or loss category while it is held or issued and not reclassify any financial instrument out of the fair value through profit or loss category if upon initial recognition it was designated by the Group as at fair value through profit or loss. The Group may reclassify that financial asset out of the fair value through profit or loss category if a financial asset is no longer held for the purpose of selling or repurchasing it in the near term. The Group shall not reclassify any financial instrument into the fair value through profit or loss category after initial recognition.

If, as a result of a change in Group's intention or ability, it is no longer appropriate to classify an investment as held to maturity, it shall be reclassified as available for sale and remeasured at fair value. Whenever sales or reclassification of more than an insignificant amount of held-to-maturity investments, any remaining held-to-maturity investments shall be reclassified as available for sale, other than sales or reclassification that are so close to maturity or the financial asset's call date, occur after all the financial asset's original principal has been collected substantially through scheduled payments or prepayments, or are attributable to an isolated event that is beyond control, non-recurring, and could not have been reasonably anticipated.

The fair value of financial assets and financial liabilities must be estimated for recognition and measurement or for disclosure purposes.

Fair values are categorised into different levels in a fair value hierarchy based on the degree to which the inputs to the measurement are observable and the significance of the inputs to the fair value measurement in its entirety:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities that can be accessed at the measurement date (Level 1)
- Inputs other than quoted prices included in Level 1 that are observable for the assets or liabilities, either b. directly or indirectly (Level 2)
- Unobservable inputs for the assets or liabilities (Level 3)

When measuring the fair value of an asset or a liability, the Group uses market observable data to the extent possible. If the fair value of an asset or a liability is not directly observable, the Group uses valuation techniques that appropriate in the circumstances and maximizes the use of relevant observable inputs and minimizes the use

Transfers between levels of the fair value hierarchy are recognised by the Group at the end of the reporting period during which the change occurred.

#### 2.h. Cash and Cash Equivalents

Cash and cash equivalents are cash on hand, cash in banks (demand deposits) and time deposits with maturity periods of three months or less at the time of placement that are not used as collateral or are not restricted.

## 2.i. Inventories

Inventories are carried at the lower of cost and net realizable value. The cost of inventories comprise all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Cost is determined using the weighted average method. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale

The amount of any write-down of inventories to net realisable value and all losses of inventories shall be recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

## 2.j. Investment in Associates

Associates are entities which the Group has the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies (significant influence)

Investment in associates accounted for using the equity method. Under the equity method, the investment in an investment in associates according to using the equity metrod. Order the equity metrod, in the associate is initially recognised at cost and the carrying amount is increased or decreased to recognise the investor's share of the profit or loss of the investee after the date of acquisition. The investor's share of the profit or loss of the investee is recognised in profit or loss. Distributions received from an investee reduce the carrying amount of the investment. Adjustments to the carrying amount may also be necessary for changes in the investor's proportionate interest in the investee arising from changes in the investee's other comprehensive income, including those arising from the revaluation of property, plant and equipment and from foreign exchange translation differences. The investor's share of those changes is recognized in other comprehensive income.

The Group discontinue the use of the equity method from the date when its investment ceases to be an associate as follows

- if the investment becomes a subsidiary. a.
- If the retained interest in the former associate is a financial asset, the Group measure the retained b. interest at fair value.
- When the Group discontinue the use of the equity method, the Group account for all amounts previously c. recognized in other comprehensive income in relation to that investment on the same basis as would have been required if the investee had directly disposed of the related assets or liabilities.

### 2.k. Prepaid Expenses

Prepaid expenses are amortized over their beneficial periods by using the straight-line method. The short-term portion of prepaid expenses is shown as part of current assets, while long term portion is presented as part of non

#### Aset Hak Guna Sewa

#### Aset Hak Guna Sewa

Aset hak guna sewa diakui pada tanggal dimulainya sewa (yaitu, tanggal aset dasar tersedia untuk digunakan). Aset tersebut diukur pada biaya perolehan, dikurangi akumulasi penyusutan. Biaya aset penggunaan hak termasuk jumlah liabilitas sewa yang diakui, biaya langsung awal yang dikeluarkan, dan pembayaran sewa yang dilakukan pada atau sebelum tanggal mulai dikurangi insentif sewa yang diterima. Aset hak pakai disusutkan dengan metode garis lurus selama masa sewa.

#### Liabilitas Sewa

Pada tanggal dimulainya sewa, Grup mengakui liabilitas sewa yang diukur pada nilai kini dari pembayaran sewa yang akan dilakukan selama masa sewa.

Dalam menghitung nilai sekarang dari pembayaran sewa, Grup menggunakan suku bunga pinjaman modal kerja pada tanggal dimulainya sewa. Setelah tanggal dimulainya, jumlah kewajiban sewa ditingkatkan untuk mencerminkan pertambahan, bunga dan dikurangi untuk pembayaran sewa yang dilakukan. Selain itu, nilai tercatat kewajiban sewa diukur kembali jika ada modifikasi, perubahan jangka waktu sewa, perubahan pembayaran sewa.

#### Sewa Jangka Pendek dan Sewa Aset Bernilai Rendah

Grup menerapkan pengecualian pengakuan sewa jangka pendek untuk sewa yang memiliki jangka waktu sewa selama 12 bulan atau kurang dari tanggal dimulainya dan tidak mengandung opsi pembelian). Pembayaran sewa untuk sewa jangka pendek dan sewa untuk aset bernilai rendah diakui sebagai beban dengan, dasar garis lurus selama masa sewa.

#### Grup Sebagai Pesewa

Sewa dimana Grup tidak mentransfer secara substansial seluruh risiko dan manfaat yang terkait dengan kepemilikan suatu aset diklasifikasikan sebagai sewa operasi. Pendapatan sewa yang timbul dicatat secara garis lurus selama masa sewa dan termasuk dalam pendapatan dalam laporan laba rugi karena sifat operasinya.

#### 2.m. Properti Investasi

Properti investasi adalah properti (tanah atau bangunan atau bagian dari suatu bangunan atau kedua-duanya) yang dikuasai oleh pemilik atau penyewa melalui sewa pembiayaan untuk menghasilkan sewa atau untuk kenaikan nilai atau kedua-duanya, dan tidak untuk digunakan dalam produksi atau penyediaan barang atau jasa atau untuk tujuan administratif; atau dijual dalam kegiatan usaha sehari-hari.

Properti investasi diakui sebagai aset jika dan hanya jika besar kemungkinan manfaat ekonomis masa depan yang terkait dengan properti investasi akan mengalir ke entitas; dan biaya perolehan properti investasi dapat diukur dengan andal.

Properti investasi pada awalnya diukur sebesar biaya perolehan, meliputi harga pembelian dan setiap pengeluaran yang dapat diatribusikan secara langsung (biaya jasa hukum, pajak pengalihan properti, dan biaya transaksi lain). Biaya transaksi termasuk dalam pengukuran

Setelah pengakuan awal. Grup memilih menggunakan modal biaya dan mengukur properti investasi sebesar biaya perolehan dikurangi akumulasi penyusutan dan akumulasi rugi penurunan nilai aset. Hak atas tanah tidak disusutkan dan disajikan sebesar biaya perolehan. Bangunan disusutkan dengan metode garis lurus berdasarkan taksiran masa ekonomis (20 tahun).

Biaya pemeliharaan dan perbaikan dibebankan pada laba rugi pada saat terjadinya, sedangkan pemugaran dan penambahan dikapitalisasi.

Grup mengalihkan properti ke, atau dari, properti investasi jika, dan hanya jika, ketika properti memenuhi, atau berhenti memenuhi, definisi properti investasi dan terdapat bukti atas perubahan penggunaan, mencakup;

- Dimulainya penggunaan oleh pemilik, atau pengembangan untuk pemilik, untuk pengalihan dari properti investasi menjadi properti yang digunakan sendiri;
- Dimulainya pengembangan untuk dijual, untuk pengalihan dari properti investasi menjadi b.
- Berakhirnya pemakaian oleh pemilik, untuk pengalihan dari properti yang digunakan sendiri meniadi properti investasi: dan
- Insepsi sewa operasi kepada pihak lain, untuk pengalihan dari persediaan menjadi properti investasi.

Keuntungan atau kerugianyang timbul dari penghentian atau pelepasan dan jumlah tercatat aset, dan diakui dalam laba rugi pada periode terjadinya penghentian atau pelepasan.

#### 2.I. Right Of Use Assets

Right Of Use Assets
Right of use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right of use assets are measured at cost, less any accumulated depreciation. The cost of right of use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right of use assets are depreciated on a straight-line basis over the shorter of the lease term.

#### Lease Liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term.

In calculating the present value of lease payments, the Group uses its working capital loan rate at the lease commencement date. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments

#### Short-term Leases and Leases of Low-value Assets

The Group applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

#### Group as a Lessor

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or lossdue to its operating nature.

#### 2.m Investment Properties

Investment properties are properties (land or a building or part of a building or both) held by the owner or the lessee under a finance lease to earn rentals or for capital appreciation or supply of goods or services or for administrative putposes; or sale in the daily business activities.

Investment property is recognised as an asset when, and when it is probable that the future economic benefits that are associated with the investment property will flow to the entiry; and the cost of the investment property can be measured reliably

An investment property shall be measured initially at its cost, comprises its purchase price and any directly attributable expenditure (professional fees for legal services, property transfer taxes and other transaction costs). Transaction costs are included in the initial measurement.

After initial recognition, the Group choose to use cost model and measure its investment property at acquisition cost less accumulated depreciation and accumulated impairment losses. Landrights are not depreciated and are carried at costs. Buildings are depreciated using the straight-line method over their estimated useful lives (20 years).

Maintenance and repairment costs are charged to profit or loss as incurred, while renewals and betterments are capitalized.

The Group shall transfer a property, to, or from investment property when, and only when, there the property meets, or ceases to meet, the definition of investment property and there is evidence of the change in use, include

- Commencement of owner-occupation, or of development with a view to owner-occupation, for a transfer from investment property to owner-occupied property;
- Commencement of development with a view to sale, for a transfer from investment property to b.
- End of owner-occupation, for a transfer from owner-occupied property to investment property; and c.

#### 2.n. Aset Tetap

Tanah dan Bangunan

Aset tetap pada awalnya diakui sebesar biaya perolehan yang meliputi harga perolehannya dan setiap biaya yang dapat diatribusikan langsung untuk membawa aset ke kondisi dan lokasi yang diinginkan agar aset siap digunakan sesuai intensi manajemen.

Apabila relevan, biaya perolehan juga dapat mencakup estimasi awal biaya pembongkaran dan pemindahan aset tetap dan restorasi lokasi aset tetap, kewajiban tersebut timbul ketika aset tetap diperoleh atau sebagai konsekuensi penggunaan aset tetap selama periode tertentu untuk tujuan selain untuk memoroduksi persediaan selama periode tersebut.

Setelah pengakuan awal, aset tetap kecuali tanah dinyatakan sebesar biaya perolehan dikurangi akumulasi penyusutan dan akumulasi rugi penurunan nilai.

Penyusutan aset tetap dimulai pada saat aset tersebut siap untuk digunakan sesuai maksud penggunaannya dan dihitung dengan menggunakan metode garis lurus berdasarkan estimasi masa manfaat ekonomis aset sebagai berikut :

	Tahun/ Years
Bangunan	20
Prasarana dan Renovasi Bangunan	3-5
Peralatan Toko dan Kantor	4-8
Kendaraan	4-8

Aset tetap yang dikonstruksi sendiri disajikan sebagai bagian aset tetap sebagai "Aset dalam Konstruksi" dan dinyatakan sebesar biaya perolehannya. Semua biaya, termasuk biaya pinjaman, yang terjadi sehubungan dengan konstruksi aset tersebut dikapitalisasi sebagai bagian dari biaya perolehan aset tetap dalam konstruksi. Biaya perolehan aset tetap dalam konstruksi tidak termasuk setiap laba internal, jumlah tidak normal dari biaya pemborosan yang terjadi dalam pemakajan bahan baku, tenaga kerja atau sumber daya lain.

Akumulasi biaya perolehan yang akan dipindahkan ke masing-masing pos aset tetap yang sesuai pada saat aset tersebut selesai dikerjakan atau siap digunakan dan disusutkan sejak beronerasi

Nilai tercatat dari suatu aset tetap dihentikan pengakuannya pada saat pelepasan atau ketika tidak terdapat lagi manfaat ekonomik masa depan yang diharapkan dari penggunaan atau pelepasannya. Keuntungan atau kerugian yang timbul dari penghentian pengakuan tersebut (yang ditentukan sebesar selisih antara jumlah hasil pelepasan neto, jika ada, dan jumlah tercatatnya) dimasukkan dalam laba rugi pada saat penghentian pengakuan tersebut dilakukan

Pada akhir periode pelaporan, Perusahaan melakukan penelaahan berkala atas masa manfaat, nilai residu, metode penyusutan, dan sisa umur pemakaian berdasarkan kondisi teknis

#### 2.o. Aset Takberwujud

Aset takberwujud diukur sebesar nilai perolehan pada pegakuan awal. Setelah pengakuan awal, aset takberwujud dicatat pada biaya perolehan dikurangi akumulasi amortisasi dan akumulasi rugi penurunan nilai.

Umur manfaat aset takberwujud dinilai apakah terbatas atau tidak terbatas.

#### Aset takberwujud dengan umur manfaat terbatas

Aset takberwujud dengan umur manfaat terbatas diamortisasi selama umur manfaat ekonomi dengan metode garis lurus.

Amortisasi dihitung sebagai penghapusan biaya perolehan aset, dikurangi nilai residunya, atas umur ekonomisnya sebagai berikut :

Perangkat Lunak Komputer; 25% garis lurus

Periode amortisasi dan metode amortisasi untuk aset takberwujud dengan umur manfaat terbatas ditelaah setidaknya setiap akhir tahun buku.

#### Aset takberwujud dengan umur manfaat tidak terbatas

Aset takberwujud dengan umur manfaat tidak terbatas tidak diamortisasi. Masa manfaat aset takberwujud dengan umur tak terbatas ditelaah setiap tahun untuk menentukan apakah peristiwa dan keadaan dapat terus mendukung penilaian bahwa umur manfaat tetap tidak terbatas. Jika tidak, perubahan masa manfaat dari tidak terbatas menjadi terbatas diterapkan secara prospektif.

Aset takberwujud dengan umur tidak terbatas diuji untuk penurunan nilai setiap tahun dan kapanpun terdapat suatu indikasi bahwa aset takberwujud mungkin mengalami penurunan nilai.

#### 2.n. Fixed Assets

Fixed assets are initially recognized at cost, which comprises its purchase price and any cost directly attributable in bringing the assets to the location and condition necessary for it to be capable of operating in the manner intended by management.

When applicable, the cost may also comprises the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an entity incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

After initial recognition, fixed assets, except land, are carried at its cost less any accumulated depreciation, and any accumulated impairment losses.

Depreciation of fixed assets starts when its available for use and its computed by using straight-line method based on the estimated useful lives of assets as follows:

_	Presentase/Percentage
Building	5%
Building Renovation and Improvement	20% - 33.33%
Store and Office Equipment	12.5% - 25%
Vehicle	12.5% - 25%

Self-constructed fixed assets are presented as part of the fixed assets under "Asset in Construction" and are stated at its cost. All costs, including borrowing costs, incurred in relation with the construction of these assets are capitalized as part of the cost of assets in construction. Cost of assets in construction shall exclude any internal profits, cost of abnormal amounts of wasted material, labour, or other resources incurred.

The accumulated costs will be transferred to the respective fixed assets items at the time the asset is completed or ready for use and are depreciated since the operation.

The carrying amount of an item of fixed assets is derecognized on disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arrising from derecognition (that determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item) is included in profit or loss when item is derecognized.

At the end of each reporting period, the Company made regular review of the useful lives, residual values, depreciation method and residual life based on the technical conditions.

#### 2.o. Intangible Assets

Intangible asset is measured on initial recognition at cost. After initial recognition, intangible asset is carried at cost less any accumulated amortization and any accumulated impairment loss.

The useful life of intangible asset is assessed to be eiter finite or indefinite

#### Intangible asset with finite useful life

Intangible asset with finite useful life is amortized over the economic useful life by using a straight-line method.

Amortization is calculated so as to write off the cost of the asset, less its estimated residual value, over its useful economic life as follows:

Software ; 25 % straight line

The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at each financial year-end.

#### Intangible asset with indefinite useful life

Intangible asset with indefinite useful life is not amortized. The useful life of an intangible with an indefinite that is not being amortized is reviewed annually to determine whether events and circumstances continue to support an indefinite useful life assessment for that asset. If they do not, the change in the useful life assessment from indefinite to finite is accounted for on a prospective basis.

Intangible asset with indefinite life is tested for impairment annually and whenever there is an indication that the intangible asset may be impaired.

#### 2.p. Penurunan Nilai Aset

Pada setiap akhir periode pelaporan, Grup menilai apakah terdapat indikasi aset mengalami penurunan nilai. Jika terdapat indikasi tersebut, Grup mengestimasi jumlah terpulihkan aset tersebut. Jumlah terpulihkan ditentukan atas suatu aset individual, dan jika tidak memungkinkan, Grup menentukan jumlah terpulihkan dari unit penghasil kas dari aset tersebut

Jumlah terpulihkan adalah jumlah yang lebih tinggi antara nilai wajar dikurangi biaya pelepasan dengan nilai pakainya. Nilai pakai adalah nilai kini dari arus kas yang diharapkan akan diterima dari aset atau unit penghasil kas. Nilai kini dihitung dengan menggunakan tingkat diskonto sebelum pajak yang mencerminkan nilai waktu uang dan risiko spesifik atas aset atau unit yang penurunan nilainya diukur.

Jika, dan hanya jika, jumlah terpulihkan aset lebih kecil dari jumlah tercatatnya, maka jumlah tercatat aset diturunkan menjadi sebesar jumlah terpulihkan. Penurunan tersebut adalah rugi penurunan nilai dan segera diakui dalam laba rugi.

Rugi penurunan nilai yang telah diakui dalam periode sebelumnya untuk aset selain goodwill dibalik jika, dan hanya jika, terdapat perubahan estimasi yang digunakan untuk menentukan jumlah terpulihkan aset tersebut sejak rugi penurunan nilai terakhir diakui. Jika demikian, jumlah tercatat aset dinaikan ke jumlah terpulihkannya. Kenaikan ini merupakan suatu pembalikan rugi penurunan nilai.

#### 2.q. Pajak Penghasilan

Beban pajak adalah jumlah gabungan pajak kini dan pajak tangguhan yang diperhitungkan dalam menentukan laba rugi pada suatu periode. Pajak kini dan pajak tangguhan diakui dalam laba rugi, kecuali pajak penghasilan yang timbul dari transaksi atau peristiwa yang diakui dalam penghasilan komprehensif lain atau secara langsung di ekuitas. Dalam hal ini, pajak tersebut masing-masing diakui dalam penghasilan komprehensif lain atau ekuitas.

Jumlah pajak kini untuk periode berjalan dan periode sebelumnya yang belum dibayar diakui sebagai liabilitas. Jika jumlah pajak yang telah dibayar untuk periode berjalan dan periode-periode sebelumnya melebihi jumlah pajak yang terutang untuk periode tersebut, maka kelebihannya diakui sebagai aset. Liabilitas (aset) pajak kini untuk periode berjalan dan periode sebelumnya diukur sebesar jumlah yang diperkirakan akan dibayar kepada (direstitusi dari) otoritas perpajakan, yang dihitung menggunakan tarif pajak (dan undang-undang pajak) yang telah berlaku atau secara substantif telah berlaku pada akhir periode pelaporan.

Manfaat terkait dengan rugi pajak yang dapat ditarik untuk memulihkan pajak kini dari periode sebelumnya diakui sebagai aset. Aset pajak tangguhan diakui untuk akumulasi rugi pajak belum dikompensasi dan kredit pajak belum dimanfaatkan sepanjang kemungkinan besar laba kena pajak masa depan akan tersedia untuk dimanfaatkan dengan rugi pajak belum dikompensasi dan kredit pajak belum dimanfaatkan.

Seluruh perbedaan temporer kena pajak diakui sebagai liabilitas pajak tangguhan, kecuali perbedaan temporer kena pajak yang berasal dari:

- a. pengakuan awal goodwill; atau
- b. pengakuan awal aset atau liabilitas dari transaksi yang bukan kombinasi bisnis dan pada saat transaksi tidak mempengaruhi laba akuntansi atau laba kena pajak (rugi pajak).

Aset pajak tangguhan diakui untuk seluruh perbedaan temporer dapat dikurangkan sepanjang kemungkinan besar laba kena pajak akan tersedia sehingga perbedaan temporer dapat dimanfaatkan untuk mengurangi laba dimaksud, kecuali jika aset pajak tangguhan timbul dari pengakuan awal aset atau pengakuan awal liabilitas dalam transaksi yang bukan kombinasi bisnis dan pada saat transaksi tidak mempengaruhi laba akuntansi atau laba kena pajak (rugi pajak).

Aset dan liabilitas pajak tangguhan diukur dengan menggunakan tarif pajak yang diharapkan berlaku ketika aset dipulihkan atau liabilitas diselesaikan, berdasarkan tarif pajak (dan peraturan pajak) yang telah berlaku atau secara substantif telah berlaku pada akhir periode pelaporan. Pengukuran aset dan liabilitas pajak tangguhan mencerminkan konsekuensi pajak yang sesuai dengan cara Grup memperkirakan, pada akhir periode pelaporan, untuk memulihkan atau menyelesaikan jumlah tercatat aset dan liabilitasnya.

Jumlah tercatat aset pajak tangguhan ditelaah ulang pada akhir periode pelaporan. Grup mengurangi jumlah tercatat aset pajak tangguhan jika kemungkinan besar laba kena pajak tidak lagi tersedia dalam jumlah yang memadai untuk mengkompensasikan sebagian atau seluruh aset pajak tangguhan tersebut. Setiap pengurangan tersebut dilakukan pembalikan atas aset pajak tangguhan hingga kemungkinan besar laba kena pajak yang tersedia jumlahnya memadai.

Grup melakukan saling hapus aset pajak tangguhan dan liabilitas pajak tangguhan jika dan hanya iika:

- a. Grup memiliki hak yang dapat dipaksakan secara hukum untuk melakukan saling hapus aset pajak kini terhadap liabilitas pajak kini; dan
- aset pajak tangguhan dan liabilitas pajak tangguhan terkait dengan pajak penghasilan yang dikenakan oleh otoritas perpajakan yang sama atas:
  - i. entitas kena pajak yang sama; atau
  - ii. entitas kena pajak yang berbeda yang bermaksud untuk memulihkan aset dan liabilitas pajak kini dengan dasar neto, atau merealisasikan aset dan menyelesaikan liabilitas secara bersamaan, pada setiap periode masa depan dimana jumlah signifikan atas aset atau liabilitas pajak tangguhan diperkirakan untuk diselesaikan atau dipulihkan.

#### n Impairment of Assets

At the end of each reporting period, the Group assess whether there is any indication that an asset may be impaired. If any such indication exists, the Group shall estimate the recoverable amount of the asset. Recoverable amount is determined for an individual asset, if its is not possible, the Group determines the recoverable amount of the asset's cash-generating unit.

The recoverable amount is the higher of fair value less costs to sell and its value in use. Value in use is the present value of the estimated future cash flows of the asset or cash generating unit. Present values are computed using pre-tax discount rates that reflect the time value of money and the risks specific to the asset or unit whose impairment is being measured.

If, and only if, the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset shall be reduced to its recoverable amount. The reduction is an impairment loss and is recognized immediately in profit or loss.

An impairment loss recognized in prior period for an asset other than goodwill is reversed if, and only if, there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If this is the case, the carrying amount of the asset shall be increased to its recoverable amount. That increase is a reversal of an impairment loss.

#### 2.g. Income Tax

Tax expense is the aggregate amount included in the determination of profit or loss for the period in respect of current tax and deferred tax. Current tax and deferred tax is recognized in profit or loss, except for income tax arising from transactions or events that are recognized in other comprehensive income or directly in equity. In this case, the tax is recognized in other comprehensive income or equity, respectively.

Current tax for current and prior periods shall, to the extent unpaid, be recognized as a liability. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess shall be recognized as an asset. Current tax liabilities (assets) for the current and prior periods shall be measured at the amount expected to be paid to (recovered from) the taxation authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Tax benefits relating to tax loss that can be carried back to recover current tax of a previous periods is recognized as an asset. Deferred tax asset is recognized for the carryforward of unused tax losses and unused tax credit to the extent that it is probable that future taxable profit will be available against which the unused tax losses and unused tax credits can be utilized.

A deferred tax liability shall be recognized for all taxable temporary differences, except to the extent that the deferred tax liability arises from:

- a. the initial recognition of goodwill; or
- the initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset shall be recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised, unless the deferred tax asset arises from the initial recognition of an asset or liability in a transaction that is not a business combination and at the time of the transaction affects neither accounting profit nor taxable profit (tax loss).

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and deferred tax assets shall reflect the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

The carrying amount of a deferred tax asset reviewed at the end of each reporting period. The Group shall reduce the carrying amount of a deferred tax asset to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of that deferred tax asset to be utilised. Any such reduction shall be reversed to the extent that it becomes probable that sufficient taxable profit will be available.

The Group offset deferred tax assets and deferred tax liabilities if, and only if:

- a. The Group has a legally enforceable right to set off current tax assets against current tax liabilities; and
- b. The deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either:
  - i. the same taxable entity; or
  - ii. different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

39. Supplementary Information

Pada awal tahun 2020, Badan Nasional Penanggulangan Bencana Republik Indonesia mengumumkan berlakunya "Status Keadaan Tertentu Darurat Bencana Wabah Penyakit Akibat Virus Corona" setelah ditemukannya beberapa orang yang teridentifikasi terpapar virus corona (dikenal juga sebagai Covid-19). Kondisi darurat ini, bersamaan dengan situasi perekonomian global yang terdampak pandemi Covid-19, menyebabkan penurunan perekonomian dalam negeri di awal tahun 2020, yang antara lain ditandai dengan melemahnya nilai tukar rupiah dan menurunnya hargaharga sekuritas di pasar modal.

Grup tidak memiliki pinjaman bank, dan memiliki pendanaan yang memadai dalam bentuk kas dan setara kas untuk mempertahankan operasional selama beberapa bulan ke depan.

Manajemen Grup menyatakan bahwa Grup tidak mengalami dampak sigifikan per tanggal posisi keuangan karena tidak signifikannya exposure kedua hal tersebut.

In early 2020, National Agency for Disaster Management of the Republic of Indonesia announced the enactment of "the Specific Emergency Disasters Corona Virus Outbreak Status" after the discovery of several people who were identified as being affected by the corona virus (also named Covid-19). This emergency condition, together with the global economic situation affected by the Covid-19 pandemic, caused a downturn in the domestic economy in early 2020, which was characterized by a weakening of the rupiah exchange rate and a decline in the prices of securities on the capital market

The Group does not have a bank loan, and has adequate funding in the form of cash and cash equivalents to maintain operations for the next several months.

The Group's management states that the Group did not experience a significant impact as of the financial position date due to the insignificant exposure of these matters.

Laporan keuangan disusun dengan anggapan bahwa Grup mempunyai kemampuan untuk mempertahankan kelangsungan usahanya. Manajemen berpendapat bahwa rencana-rencana tersebut dapat secara efektif dilakukan dan Grup dapat terus beroperasi sesuai prinsip kelangsungan usaha sampai dimasa mendatang.
